DATE: 23 August 1991

DISTRIBUTION

FROM: Pat Mosman

SUBJECT: Changes to GD/FW T.O. for 56830-3 & -5

REF: Visit by D.R. "Don" Emerson of General Dynamics
Fort Worth F-16 for Validation of Changes
August 15 and 16, 1991

On behalf of General Dynamics Fort Worth F-16 Technical Publications Department, I want to thank you for your contribution to the expedited validation of the changes to the T.O. for our Part Number 56830-3 & -5. Thanks to your cooperation and the support of your supervisors and managers, we were able to have the review copy of these changes available for GD on the 15th of August with validation taking place on the 16th and the "Final Copy" in GD's hands by the 22nd.

This accomplishment will make it possible for General Dynamics to meet their deadline for submittal to the Air Force and they are most appreciative of our efforts on their behalf. Again, thank you all!

In addition, congratulations to the Reliability/Logistics and Purchasing Departments for selecting Prefontaine and Associates to work on this project. Mr. Prefontaine was well received by Don Emerson of GD. Mr. Harold Gregory of GD's Technical Publications Department asked me to tell you that the manuscript delivered to them is "one of the best final copies of a manuscript we have ever seen and absolutely the best done by a subtier supplier."

Regards,

Pat
